

7000 SERIES DIGITAL HANDSETS

Handsets for all applications

Available in Ice White or Graphite Grey, the 7000 Series digital system telephones can be chosen to complement your office equipment. Office productivity can be increased using the wired headset port available on 8-button telephone and above, or using a Bluetooth headset on the 24-button telephone with the optional Bluetooth module. Important calls can be recorded on your PC via the optional USB module.

Enjoy the benefits of some advanced features that include:

Save Time

- Menu driven soft keys allow you to save time whilst on a call. The soft key functions will change depending upon call status.

Freedom to roam

- User of the 24 button handsets can benefit from wireless communications with an optional Bluetooth module for their phone. The Bluetooth module allows connection of a standard Bluetooth headset to the phone.

Intuitive Display

- Crystal clear LCD allows display phones to be your window to the system. Call information is clear and user programming is quicker and easier with an LCD.

Improved Efficiency

- An optional USB module for the 24 button handsets allows user to combine the familiar setting of their PC Desktop with the handsets for one-click call recording.

User-friendly

- The navigation button on the larger handsets allows one-touch access to user features and programming.

Designed for comfort

- Users of the 8 button phone and above can utilise a built-in headset port for convenience and comfort. Headset that have a standard 2.5mm jack connection can be connected directly to the 7000 series handsets.
