

## **Protect your Telephone System from Power Damage and Minimise Business Disruption During Power Outages**

Electrical disturbances and power outages caused by wind, storms and accidents can happen anytime. Eliminate the inconvenience and expense of telephone system damage, lost data and computer damage with a UPS power supply battery backup system.

Battery backup products feature premium surge protection for all outlets and phone/modem connections and a comprehensive connected equipment warranty.

**Please speak to our sales team to discuss your requirements.**

Off-the-shelf or customer built products are available and will be designed based on your requirements.

From single servers to complete communications rooms, our team can provide you with a product to protect your investments from unnecessary damage.
