Brunswick Business Park, Merseyside L3 4BJ

September 12, 2008

ILME UK LIMITED moved to new purpose built premises in January 2007.

M.H. Communications worked very closely with us from day one to advise, design and install a future proof, voice and data network system throughout the Company.

With the installation of the latest Mitel phone system and the management of the complete system, M.H. Communications Limited delivered a first class installation within the timescale required. Credit to all engineers, staff and Mike Hayman who worked very hard to ensure when the factory opened all communications – phone fax and internet were operational from day one.

With excellent support and maintenance service, we have no hesitation in recommending them to anyone.

Again, many thanks to all involved with M.H. Communications and best wishes for the future.
