

1st December 2008

We contracted MH Communications to upgrade our LG system back in 2006; MH Communications came as a trusted and reputable company at the time.

Having a very high standard in the hospitality industry, I was surprised by their attention to detail in installation, support and training combined with advice on future developments.

The MH Communications team is highly skilled and professional and Mike Hayman is committed to the customers needs. He is always available should any queries arise.

We would highly recommend MH Communications to anyone looking for telecommunications in their business.

Gurval Durand
Deputy General Manager
