M H COMMUNICATIONS

We were first introduced to MH Communications in 2000 when they installed a complete system at these premises. The work was conducted professionally over a weekend to minimise disruption to the business. Since this time, we have had very little communication with Mike and his team as the system worked to our complete satisfaction.

Deciding on an upgrade, we approached Mike for advice. He instantly came in with money saving deals on both our calling plan and hardware. Mike and his team instigated the complete transition and followed on with training on the new LG digital telephone system.

We had no hesitations in approaching MH Communications again after so long and received the same dedication and support that was shown many years previous.

An impressive, well knowledgeable company that has customer satisfaction as there number one goal.

Mandy Yould
Company Secretary
